Getting you back to business!

Welcome to The Solution House. We are a well established Yorkshire-based display and branding production facility. Our client list includes Google, Mira, Jet2.com and McLaren. Recently, we've put our world class factory to good use and carefully developed a range of workplace shields to help businesses like yours return to work in line with social distancing rules. So whether it's face visors for your customer advisors or divides for your office desks - we've got your back. If you don't find what you're looking for, get in touch and we'll happily take your brief. Thank you for thinking of us. We look forward to helping you get back to business.

Made in Yorkshire

Everything you see in this brochure is made to order at our Yorkshire factory. We've secured the raw materials to create commercial quantities to help meet the nationwide demand. And if you don't see what you need, ask us about making a bespoke order - we'll be happy to help.

Low cost solutions

We know that getting back to business is going to be difficult for many. That's why we're committed to keeping costs down - and our low cost range ticks all the boxes without compromising on quality or safety.

Friendly, not frosty

When you go back to work, no one wants to see solid, dark and unsociable divides. We developed our range of workplace shields to make sure that each item offers transparent 'windows' - so that open plan spaces look as great as they always did.

Speedy service

There are no long lead times with us. Once you've made your order, the most important thing for us to do is to get it to you quickly and safely. In most cases, we'll produce and deliver your order within 10 days. But if you're in a rush, ask us about our Express Service.
